DETAILED ACTION

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification doesn't provide any support for the tongue receiving surface being disposed generally perpendicularly to the shaft axis. The examiner is interpreting this limitation (the tongue receiving surface being disposed generally perpendicularly to the shaft axis) as new matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Blachly.

Blachly discloses in figures 1-4 an apparatus for placement within the mouth comprising an outer shield, 22 having an inlet port 44, an elongated shaft 10 having a longitudinal axis (fig. 1), terminating into a first end defining a generally concave tongue portion 16, and a second end disposed within the outer shield inlet port (fig. 1), the shaft having an inner plate 12, disposed by the outer shield and the concave tongue receiving

surface (fig. 1), the shaft includes an outlet port 18 and the inlet port is defined by a cylindrical wall (the wall 42).

Allowable Subject Matter

Claim 4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 5-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed October 3, 2005 have been fully considered but they are not persuasive. Applicant argues that Blachly doesn't disclose the concave tongue receiving surface being perpendicular to the shaft. However, as set forth above, there is no support in the specification for the tongue supporting surface being perpendicular to the shaft. The original disclosure provides no support for this structure. Thus, the tongue support surface being perpendicular to the shaft was interpreted as new matter.

Applicant argues that the device disclosed by Blachly is an oropharyngeal airway tube and a bite block assembly wherein the elongate shaft defines a generally horizontal disposed concave portion. However, Blachly disclose the same structure that applicant is claiming, as set forth above in the rejection. All arguments pertaining to Kuo are moot because claims 4-8 have been objected to as having allowable subject matter.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

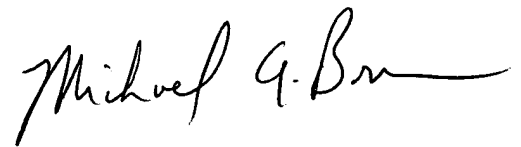

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
